Subject: Re: January 2016 Update NECN meeting

Alanna,

The monthly **City of Portland Office of Neighborhood Involvement (ONI)/ Neighborhood Coalition Directors and Chairs Meetings** are coordinated by Paul Leistner of ONI, and the particular Coalition Office that hosts the meeting on a given month. (The meeting location/organizational host rotates every month).

To ask to present information regarding an update for the Portland Harbor Superfund site during an upcoming Board and Chairs meeting on the second Tuesday of the month (January 14, February 11, etc.), Paul can be reached at Paul.Leistner@portlandoregon.gov.

Thank you and we look forward to hearing more about the community engagement elements of the Portland Harbor Superfund site.

Damon Isiah Turner | Executive Director
Northeast Coalition of Neighborhoods (NECN)

Subject: January 2016 Update NECN meeting

Hello,

My name is Alanna Conley, community involvement coordinator with the U.S. Environmental Protection Agency. I am contacting you to request time during

January 2016 Director and Board Chair meetings to provide a brief update regarding the Portland Harbor Superfund site and to hear feedback on how EPA can best conduct outreach to neighbors. As you may know, Portland Harbor is contaminated with many hazardous substances, which have been found to be harmful to human health and the environment. [Portland Harbor Cleanup Info](#) (Learn more).

In the Spring of 2016, EPA anticipates having a proposed clean-up plan for Portland Harbor. The public will have an opportunity to review and comment on the plan. EPA will take public comments into consideration prior issuing a final decision.

Until that time, EPA plans to continue to engage with the community, provide updates, answer questions and share information. Reaching out to neighborhood associations is one of the various methods we are using to engage concerned citizens.

Please let me know of opportunities during the January, Coalition Director or Board Chair meetings, that we could provide a brief update and hear ideas on how EPA can best conduct direct outreach to neighbors/residents.

Thank you,
Alanna Conley
